Comment Area

1. Very nice slides. Use good methods to help us to memorize.
2. Dr. Liu is a great teacher and an intelligent man. His teaching style is infectious, in that it makes me want to learn the material, no matter how dry it may be. The guest speakers were terrific, the material (for the most part) was terrific, and Dr. Liu's lectures were terrific.
3. Enjoyed the guest lectures very much and the case studies summarizing the different concepts talked about in class was very well done.
4. Dr. Lius class was maximal experience of learning! His lecture slides just like arts. Dr. Liu is a superior instructor. He explains, he demonstrates, and he inspires. Dr. Lius course has really broadened my horizon to the amazing world of metals in biology and medicine. After taking this course, I am deeply attracted by this fantastic scientific area.
5. Hope there would be more supportive relevant information for students not familiar in this area
