8 - Your written comments are an important part of your course and instructor evaluation. Please provide feedback in the box below on aspects of the course and/or the instructor that were most effective or need improvement. Student comments will be provided to your instructor only after course grades have been submitted. Aimin Liu -

Response Rate	5/5 (100%)
<ul style="list-style-type: none">• Dr. Aimin Liu is extremely knowledgeable in mechanistic enzymology, and I really appreciated how he connected complex enzymatic mechanisms to real biochemical problems. His explanations were detailed and clear, and the way he integrated journal paper into lectures helped deepen my understanding of how enzyme mechanisms are discovered and studied. One thing that was especially effective was how he encouraged us to think beyond memorization and really focus on mechanistic reasoning. The course was challenging but very rewarding, and it strengthened both my critical-thinking skills and my confidence in reading advanced biochemical papers.• I really enjoyed my course with Dr.Liu• I like the way you teach and explain most important subject matters slowly.• Dr. Liu is certainly an expert within his field and brings that experience and a great passion for teaching mechanistic enzymology. The course structure is well organized for a graduate-level course, providing an in-depth look into advanced topics in enzymology. Dr. Liu supplements the material with insights into fresh topics based on the work throughout his academic and independent career. The exam material is emphasized during his lectures and topics are reflected within the exam to capture the big-picture of the instruction period which was refreshing. Given all of this, I would recommend this course and any other offered by Dr. Aimin Liu to anyone.• Aside from my own failings, Dr. Liu again stands as the best professor I have ever had the pleasure of having. He has encouraged me to really reach for the moon in my education. He is the sole reason I pursued a graduate course, despite knowing I would struggle. I will greatly miss his lectures and hope his future endeavors treat him really well!
